Karla Call

Dear Karla,

Thank you for the information regarding the composition of your Shower Shimmy Bathroom Cleaner. We have reviewed the ingredients with regard to environmental and safety concerns and can make the following statements:

1. According to manufacturer's literature, the surfactants are described as "readily biodegradable".
2. Non-surfactant ingredients are naturally occurring in certain types of plants.
3. All ingredients are marketed for use in personal care applications, such as shampoo or soap or are commonly found in food products.

Best regards,

A handwritten signature in black ink, appearing to read "John Hindman".
